## **Prof. Alexander Boksenberg, University of Cambridge visiting the SAI International School**

It was indeed a matter of great pride and privilege as we had the renowned Prof. Alexander Boksenberg, University of Cambridge visiting the SAI International School today.

He is a Fellow of the Royal Society (the UK academy of science), Chair of the UK National Commission for UNESCO and Chair of its Natural Sciences Committee, Honorary Professor of Experimental Astronomy in the University of Cambridge, Extraordinary Fellow of Churchill College in Cambridge, Visiting Professor of Physics and Astronomy and Fellow of University College London, and Executive Editor of Experimental Astronomy (Springer).

We had the opportunity to listen to Prof. Alexander speak, as he took us on a tour of words down the memory lane. He spoke about the impossible being possible and that it was very important to have the right start. He also mentioned that here at SAI International, the students fortunately have the opportunity to achieve their dreams. Curiosity and enthusiasm are the most important ingredients to make man successful. It can be the simplest of all things that arouses our curiosity, which propels us to learn further in order to find answers. In us lies a budding scientist waiting to unfold its wings, so follow your dreams and don't give up till you do so and learn to your heart's content as knowledge is power.

We were indeed extremely fortunate to have Prof. Alexander in our school as his words didn't just inspire us but shall enable us to achieve our goals and dreams.
