MOTHER'S DAY

Mothers are the ones who give a meaning to the phrase "Love at first sight" as all of us have been in love with our mothers ever since we saw them. Of all rights that a woman has, the most cherished is that of being a mother. To applaud this most divine creation of God, His own replica, a Mother, SAI International Family got together to celebrate Mother's Day on the 23rd of March with vigor and joy.

Mothers of students from class playgroup to class III participated wholeheartedly in the event. Our little bundle of joys performed for every mother and reiterated to them that they are loved beyond words. Mothers were treated to a beautiful song, sensitive thoughts, a cute dance and an inspiring skit. This was followed by the mega event of 'Create a disguise'- Fancy dress for the mothers. It was indeed a pleasure to see the Moms performing wonderfully for a smile on their little one's faces. The effort taken by each one was commendable. The fancy dress show was a beautiful blend of creativity, fun and learning and a total blockbuster hit.

The mothers were overwhelmed and thanked the school for being given a chance to perform along with their kids. A certificate of appreciation was presented to every mother-child duo and a standing ovation was given to them for an admirable job.

EARTH HOUR

Earth Hour is a fabulous opportunity for the society to do something constructive for the planet that we live in. Climate change and depleting resources are an issue of growing concern and hence it becomes imperative for us to be sensitized about them. Earth hour which is a global WWF (World Wildlife Fund) climate change initiative was observed on Saturday, the 23rd of March from 8:30 to 9:30 PM. On that one night for that one hour more was done, more was observed and more was learned about the contribution that each one of us can make to our planet.

SAI International School participated wholeheartedly in observing the Earth Hour. Students were made conscious about the importance and relevance of this movement. Our young ones splurged their thoughts in a creative manner and came up with excellent pieces of art and meaningful slogans marking this day. Turning off electrical devices, unnecessary lights and using eco friendly candles was encouraged to reduce the energy consumption thus leading to lesser emitting of carbon dioxide.

We are thankful to the parents who supported us in this movement. Global warming is a crucial issue and needs to be constantly monitored. Intensive measures have to be taken to bring the world together as one community to do something for the planet that has given us so much. Out of 8760 hours in a year let's give one back to Earth.
